PRESENTATION ON

MINI PROJECT

(GAME KINGDOM)

MEMBERS OF (MINI PROJECT)

1) MR. ALTAMASH S. SHAIKH,   389CS21005
2) MR. MD OWAIS N. ANSARI,   389CS21025
3) MR. MD ADIL M. KHAN,   389CS21019

GUIDED BY

1) SHRI. BHUSHAN DONGRE   CO-FOUNDER/ZCL

2) PROF. P. L. HALGEKAR   HOD/CSE

6TH SEMESTER (2023-24)

❑ **INTRODUCTION:**

About the Project

➤ Gaming is playing an electronic video game, which is often done on a dedicated gaming console, PC or smartphone. People who often play video games are called gamers.

➤ Gaming is usually played individually or with multiple players locally. A video game console, such as an Xbox, PlayStation or Switch is commonly connected to a TV.

GAMING KINGDOM

❑ PROJECT AIMS AND OBJECTIVES:

Fig:14:Grand Theft Auto V

When you click on play button, here you can see the trailer of the gta v and Download the game through download link.

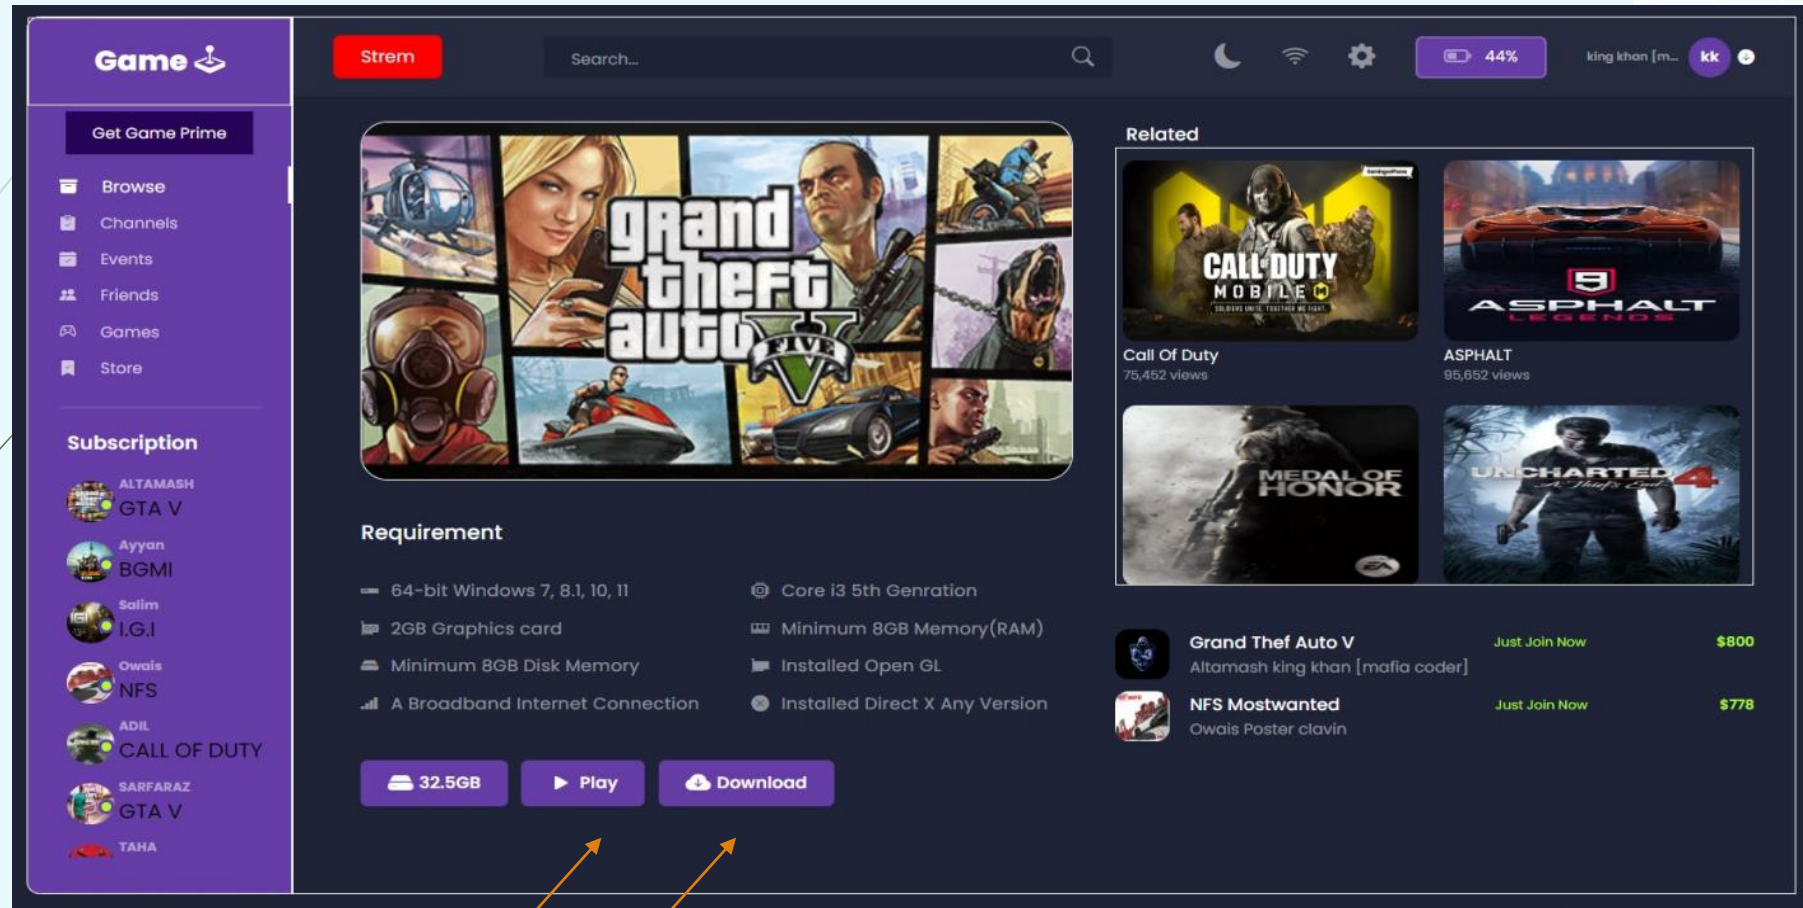

Fig:15:Play button & Download

LANGUAGES ARE USED

❖ **HTML (Hypertext Markup Language):**

Hypertext Markup Language (HTML) is the standard markup language for creating web pages and web applications.

❖ **CSS (Cascading Style Sheets):**

CSS (Cascading Style Sheets) is a vital web technology used to control the presentation and layout of web pages. It defines the visual appearance of HTML elements, such as fonts, colours, spacing, and positioning.

❖ **JAVA SCRIPT:**

JavaScript is a versatile programming language used for web development. It enables interactive and dynamic elements on websites, such as user interfaces, animations, and real-time updates. JavaScript is a client-side language, meaning it runs in web browsers. It also has server-side applications through platforms like Node.js.

❑ **Data base:**

A database is an organized collection of structured information, or data, typically stored electronically in a computer system. A database is usually controlled by a database management system (DBMS)..

- A gaming database stores player information including usernames, passwords (hashed), and profiles.
- It manages game data such as titles, genres, developers, and release dates.
- The database holds game assets like images, audio files, and 3D models.
- It tracks in-game economy transactions, virtual currencies, and item inventories.
- Additionally, it records game sessions, leaderboards, social interactions, and analytics for player behavior.

Advantages & Disadvantages of Gaming kingdom

Advantages:

1. Problem solving

2. Video games can improve your vision

3. Gamers may have better social skills.

4. Decision Making

5. More Motivation

6. Brain Booster.

Disadvantages:

1. Depression

2. Poor concentration

3. Health problem

4. Video games are addictive

5. Poor academic performances

6. Toxic environments

Future Scope

The future scope of our gaming website involves expanding content diversity to encompass game reviews, news updates, and community forums, fostering an engaged and interactive user base. Our goal is to optimize for mobile platforms, integrating e-commerce functionalities for in-game purchases, and embracing emerging technologies like VR/AR to deliver immersive gaming experiences, setting new standards in the gaming industry.

Thank you
